- Bootstrap: Intermediate
- Unity: Basic
- Creation of web and mobile style guides
- HTML: Advanced
- Figma: Intermediate
- Python: Basic
- Analysis and design of web pages
- CSS: Intermediate
- JQuery: Basic
- Project Management

Projects

Junior Frontend Developer, *Our Pet Family* ↗   2024

As a Junior Frontend Developer in a project for a veterinary website, part of the "Web Design and Development" diploma from UNAM, my key contributions included:

- Designed and developed the website from concept to execution, ensuring a user-friendly and visually appealing interface.
- Procured hosting and domain services, effectively setting up the website on the server for public access.

Junior Frontend Developer, *Tecnolochicas* ↗   2023

- Cloned the Google search engine interface using HTML and CSS, replicating its design and functionality to demonstrate proficiency in web development fundamentals.

Junior Frontend Developer, *Juego Secreto* ↗   2023

- Developed the "Secret Number Game", applying JavaScript to create engaging gameplay that challenges users to guess a hidden number.
- Implemented logic and algorithms in JavaScript to ensure a dynamic and interactive user experience, fostering problem-solving skills.

Professional Experience

Operations Analyst, *Saque y Pague*   02/2023 – 09/2023

- Conducted real-time monitoring of ATMs to ensure seamless operations.
- Generated tickets for efficient fault resolution, minimizing downtime.
- Facilitated communication between field engineers and the cash-in-transit company, optimizing service delivery and operational efficiency.

Education
